

EXTENSIVE OUTAGE PLANNED IN ZUNI ON MARCH 10, 2021

An upgrade to improve the quality and reliability of power to the Pueblo of Zuni area will require CDEC to perform an extensive outage on **March 10, 2021**, from **8 a.m. to 4 p.m.**

The outage is necessary to enable CDEC to disconnect power lines from the old Zuni substation equipment and reconnect the cables to the new substation.

It's critical for those in the Zuni area who depend on electricity-powered medical equipment to have battery-powered backups or make arrangements to stay in a location with access to electricity during this outage. CDEC is working with public-safety officials, schools and other Zuni agencies to ensure the area is fully aware of the upcoming planned outage.

In an effort to reduce the outage time, crews will work as diligently as safety allows to make the power line switch-over to the new substation equipment. Thank you, in advance, for your understanding and patience as we complete this \$2.3 million investment to improve our service to you.
